Time Management, Teamwork, Problem-solving, Engaging Presentation.

Projects

Notes

(Code)

- Developed a Flutter-based notes application for users to create, edit, and organize their notes efficiently.
- Implemented user authentication to enhance app security and privacy, offering secure signup and login methods.
- Implemented a user-friendly interface with features including note creation, editing, and deletion.
- Utilized Flutter for the frontend, showcasing proficiency in building cross-platform mobile applications.
- Backend powered by Node.js and Express.js, providing a robust and scalable server infrastructure.
- Employed MongoDB as the database to store and manage user-generated notes securely.

Nov 2023 - present

Tech used: Flutter, Node.js, Express.js, MongoDB

GitSpy

- Developed "GitSpy," a Flutter-based web app that allows users to discreetly observe recent activities of other GitHub users.
- Designed a responsive user interface for an optimal user experience across various devices.
- Integrated GitHub API to fetch and display relevant information about the recent activities of targeted GitHub users.
- Ensured an intuitive and easy-to-use interface, making it effortless for users to navigate and access the desired information.
- Demonstrated proficiency in Flutter for cross-platform application development.

Aug 2023 - Sept 2023

Tech used: Flutter

MealMate

(Code)

- Created "MealMate," a visually stunning Flutter app designed to assist users in discovering and preparing a diverse range of recipes.
- Implemented powerful filters to enable users to select meals based on specific dietary requirements or personal preferences, enhancing the app's utility.
- Crafted a visually appealing UI to provide users with an engaging and seamless navigation experience.
- Showcased proficiency in Flutter for building a cross-platform mobile application with a focus on both aesthetics and functionality.

June 2023 - July 2023

Tech used: Flutter

Expense Tracker (Diploma Project)

- Developed a digital diary application in Java and XML, allowing users to effortlessly track and manage their income and expenses.
- Implemented a robust backend using PHP and MySQL to store and organize financial data securely.
- Designed an intuitive user interface for easy navigation, providing a seamless experience for recording and categorizing transactions.
- Created dynamic graphs to generate comprehensive reports, offering users visual insights into their income and expenses over time.

2021

Tech used: Xml, Java, Php, MySql

Certifications

June-2023 **Flutter and Dart - The Complete Guide**, Udemy

Udemy

Jan-2023 **Object Oriented Programming in Java**, University of California San Diego

Coursera

Jan-2022 **Object-Oriented Data Structures in C++**, University of Illinois at Urbana-Champaign
